Floral Wedding Dresses

Floral Wedding Dresses

by gaby on 2 July, 2015

If there's one trend that has just EXPLODED all over the runways and new collections this year, it's flowers and floral prints. And these are not like your typical flowery dress, oh no. Combine gorgeous colours, pretty prints and watercolour effects with bridal shapes and dreamy fabrics, and you get something truly spectacular – real little works of botanical art. I'm stoked that a couple of our real brides over the years have been ahead of this curve, but I've seen so many pretty examples on the wedding web of late that I couldn't wait to share my favourites with you in a roundup. And since our theme for July is 'Greenhouse', there's never been a better time!

(love the solid white bridesmaid dresses to contrast with the floral gown!)
